

WYCHWOOD BREWERY

HOBGOBLIN

RINGTONES USAGE GUIDANCE

Please note that this advice is for guidance only, by following these instructions you are aware that Wychwood Brewery accepts no responsibility or liability for any damages or technical complications that either the digital materials or our instructions to use them may inadvertently cause.

BLUE TOOTH

By connecting a USB blue-tooth device to your computer it should be possible to pair with your phone and wirelessly upload music and image files into your phones library. Some Apple mac computers have bluetooth pairing inbuilt into their systems which is accessible through their top navigation bar.

DIRECT TO MOBILE

For users who would like the additional service of the ringtone to be delivered directly to their handset via a WAP push SMS message please text Goblin to 60300 with the word ringtone. Please ensure there is a space between the words Goblin and ringtone. Each request will cost 25p plus your standard network operator charges and extras for texts and data transfer. You will receive two messages and will be required to accept the second SMS message to download the ringtone directly to your handset. The service is provided by Wychwood Brewery + 44 (0)1993 890 800

USB UPLOAD

Most mobile phone devices will be provided with their own USB connection device and system. Simply connect the phone and upload the mp3 or jpg file into your phone system for use from it's library.

For any issues or questions relating to the above please contact us at support@wychwood.co.uk
